

**About roman brooches with a swastika  
body and branches ended in a horse head  
(Abstract)**

The author presents some roman brooches with a swastika body and with the branches of the swastika ending in a horse head, coming from Belgrad and Brestovick, in the present in the National Museum from Belgrad. Comparing these pieces, dated in the IV-th century, with some Dacic ones, N. Gudea assumes these brooches could be dated sometimes before the IV-th century.
