

Imports of *Terra Sigillata* from Westerndorf at Tibiscum - Jupa.

The building I (the Glass Workshop)

(Summary)

The sigillata vessels discovered at Tibiscum, building I- the glass workshop, comes, all of them, from the production center of Westerndorf. There are 10 vessels, manufactured by *Comitalis* and *Helenivs*. The great number of sigillata fragments means that the imports were regularly and can be connected with the glass workshop prosperity. Tibiscum is the center that has the greatest number of Westerndorf sigillata vessels, comparing to the roman province Dacia. The beginning of import period was in the reign of Septimius Severus and ended in the middle of the III century. The first half of the III century represents the greatest economic development period to the roman municipium- Tibiscum.
