Cuvinte cheie: *terra sigillata*, ceramică, atelier

Key words: *terra sigillata*, pottery, workshops

Abstract: *At Tibiscum were discovered 12 terra sigillata vessels from the workshops of the founder potters of Rheinzabern pottery center, Ianvarivs I and Reginvs I. The vessels were dated during Antoninus Pius and Marcus Aurelius reign. The large quantity of vessels from the beginning of Rheinzabern activity, comparing with others forts and cities from roman Dacia, can be justified by the fact that Tibiscum it's situated close to the Danube. It is possible that Tibiscum may be a redistribution center for Rheinzabern pottery.*
