PIESE DE ECHIPAMENT MILITAR DESCOPERITE ÎN VILLA RUSTICA DE LA GÂRLA MARE (II)

Paul Dinulescu

Cuvinte cheie: echipament militar, bronz

Keywords: military equipment, bronze, Gârla Mare

Abstract: During the archeological researches in villa rustica from Gârla Mare were discovered a series of pieces of military equipment. In this article we tried to make a typological frame of these pieces basing on analogies with other pieces discovered on Dacia. We describe five pieces, all made of bronze, and all being parts of the military equipment of a footman/infantry man. Because we do not have enough information, we cannot assign these pieces to a particular military unit.
