

IMPORTURI DE *TERRA SIGILLATA* ÎN SUD-VESTUL DACIEI DE LA MEȘTERII *CERIALIS* ȘI *COMITIALIS* DE LA RHEINZABERN

Marinela Trăilă Țundrea

Cuvinte cheie: terra sigillata, import, atelier, producție

Key words: terra sigillata, import, production, workshop

Abstract: *Cerialis* and *Comitialis* belong to the most important group of terra sigillata manufacturers from Rheinzabern. In roman Dacia, in the researches efectuated by now, were discovered only 26 vessels. At Tibiscum and Romula are the most numerose discoveries – 9 vessels for each site. Sporadicly, their products were discovered at Ulpia Traiana and Apulum – 2 items, Praetorium-Mehadia, Drobeta, Potaissa and Slăveni – 1 item.

Rheinzabern products were discovered in the sites situated near the Danube river – Tibiscum, Drobeta, Romula, Mehadia, Slăveni and they are wery rare in the Porolissensis Dacia, only 1 item was discovered at Potaissa. This situation can be justified by the fact that Rheinzabern products were distributed in Dacia by the trade route of the Danube river.

Terra sigillata imports from *Cerialis* and *Comitialis* can be dated during marcomanic war and Severer dynasty.
