

PIESE DE ARMAMENT MILITAR ROMAN DIN OS CORN ȘI FILDEȘ

Dinulescu Paul

Cuvinte cheie: arme romane, os, import, spathae, gladius

Key Words: roman wepons, bone, import, spathae, gladius

Abstract: pieces of Roman military weapons from bone, horn and ivory discovered so far in the Province of Dacia are quite rare and consist of chapes, sword- grip, handguards, bow laths, and bone nocks of arrows. This kind of arms were found in roman forts from Tibiscum, Micia, Urluieni, Romita, and Apulum. Discovered pieces covering the entire period of Roman rule in Dacia.
